Training in Advanced Quantitative Methods

Please set out the Advanced Quantitative Methods training you intend to undertake during your doctoral programme. Please include specific courses, training programmes, mentoring etc and include the dates where possible.

Application of training to research design

Please describe how the training you intend to undertake in the future will impact on the design of your research and your data analysis. If you are intending to collect primary data please indicate your proposed sample organisation and size and subsequent approaches to quantitative analysis. If you are intending to use secondary data sources please indicate the datasets you plan to access alongside the quantitative methods you will use for your analysis (750 words maximum).

Supporting statement from Principal Supervisor

Please comment on the benefits to be gained by the student from the quantitative methods training that is planned for the future. Please include the student's training needs and how these will be met. Please indicate whether that training can be delivered from within the DTP or through courses provided by other sources. Please also comment on the planned or actual application of the training to the student's proposed research topic.
